

Sarastro

Upper Module Packing Instructions

The packing accessories are:

- i. (2) ATA approved flight cases;
- ii. (2) Fabric covers.

Each upper module flight case has four locking latches and it provides space for:

- i. (1) Upper module cabinet;
- ii. (1) Aluminium isolating platform.

1. Remove the two connector posts from the upper module. Place them aside for later instructions;
2. With the help of a second person, open and completely remove the upper shell of the flight case. Then, bring the bottom of the flight case next to the upper module cabinet. Make sure to match the serial number of the upper module with the flight case;
3. Cover the upper module with the supplied protective fabric bag. The bottom elastic band should surround each corner of the cabinet.
4. Insert one aluminium isolating platform at the bottom of the flight case;
5. With the help of a second person, take the upper module cabinet and carefully install it inside the flight case;
6. Repeat step 1 to 5 for the second module;
7. Place the two connector posts inside the plastic box provided in the lower module flight case ;
8. With the help of a second person, carefully install the flight case cover by matching the two black pop rivets together. Locking the latches with tie wraps is highly recommended;
9. The Sarastro's upper modules are ready to be addressed and shipped.

Upper Module Unpacking Instructions

The packing accessories are:

- i. (2) ATA approved flight cases;
- ii. (2) Fabric covers.

Each upper module flight case has four locking latches and provides space for:

- i. (1) Upper module cabinet;
- ii. (1) Aluminium isolating platform.

1. Cut and remove the tie wraps which locks the four latches;
2. Lift each of the latch's handles, then twist counterclockwise 180 degrees and pull to release the latches;
3. With the help of a second person, gently lift the upper shell of the flight case and place it aside;
4. With the help of a second person, carefully remove the upper module from the flight case;
5. The protective fabric bag covering the module is held by four elastics located at each corner under the module. Release them and gently lift the cover;
6. Carefully place the aluminium platform on top of the lower module cabinet by matching the edge angles;
7. With the help of a second person, sit the upper module on the aluminium platform
8. Repeat step 1 to 7 for the second module;
9. The connector posts, owner's manual and warranty card are located inside the lower module flight case underneath the lower module;
10. For proper installation, please read the Installation Chapter of the manual;
11. After installation, you should store unused accessories inside the case before storage.
